

TeCh COMPILER

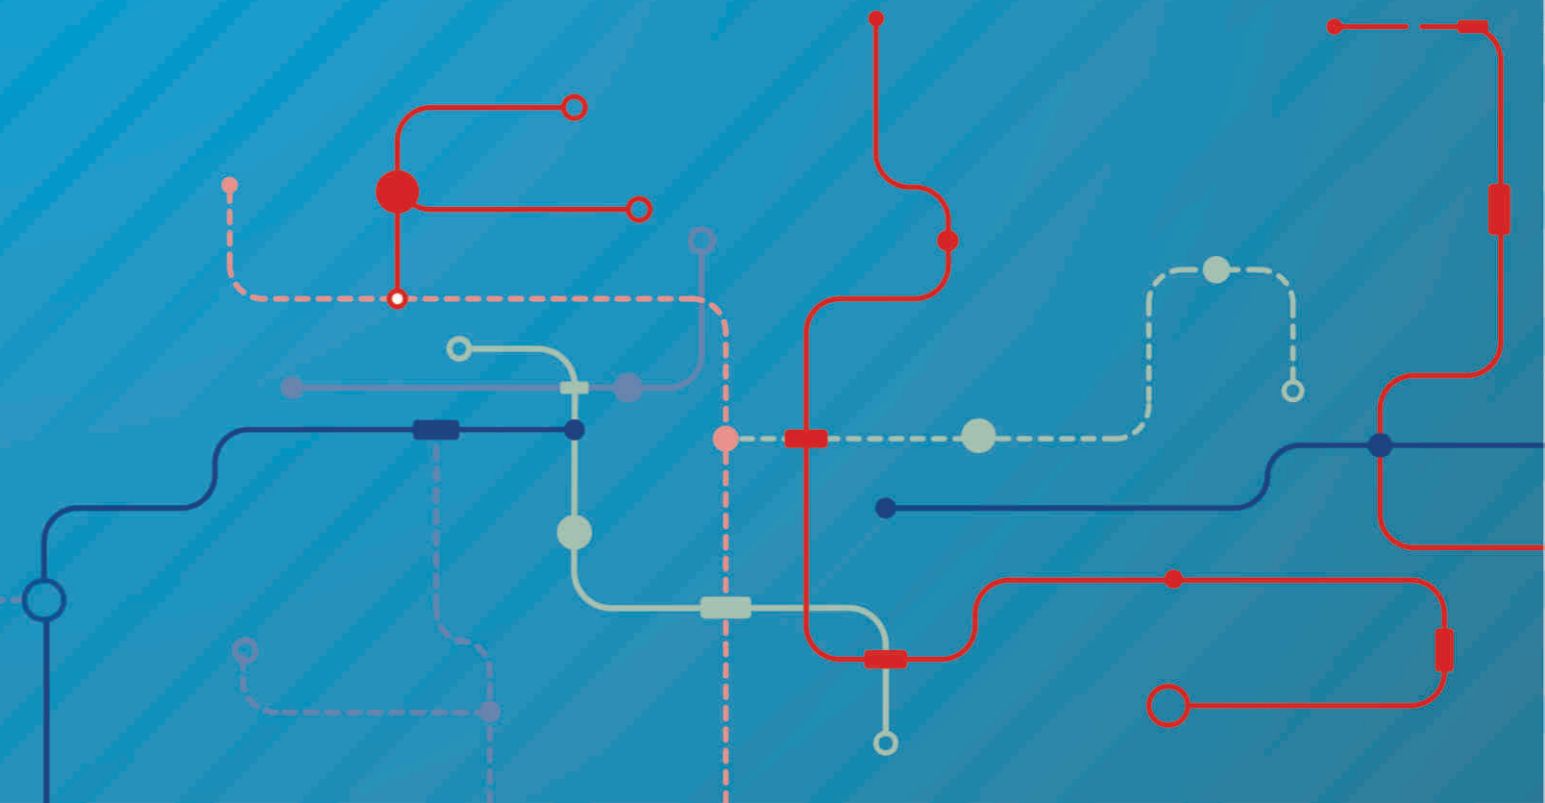

INTRODUCTION

Tech Compiler is a global IT software solutions provider. Leveraging deep industry & functional expertise, leading technology practices, and an advanced global delivery model, we enable companies to unlock their business potential. Tech Compiler provides insight, people, technology, and service to achieve the best results. Our service offerings include application development, technology consulting, custom software development and software testing services.

Tech Compiler assists clients in making informed business decisions through high-impact insight, advice, and research. Tech Compiler builds its reputation on commitment to provide products and services that improve customers business by delivering maximum profitability and return on investment. Through a combination of expert domain, technological strengths and experience in handling large projects, we are supporting our clients in everyday business challenges they may face.

Our software professionals have multiple platform skills and rich domain experience in various industry segments. Our project management staff has developed methods and structures that allow us to manage complex projects. Our clients enjoy the control over projects that comes with merging their personnel and our staff in a unified team working to promote a transfer of knowledge, while, our consultants have the expertise to handle projects of any size with confidence.

CORE VALUES

Tech Compiler's core values contribute significantly to our office culture and drive excellence in everything we do—from our hiring process to our daily work to our interactions with our colleagues, partners, and customers. These values include the following:

Quality in Everything we do

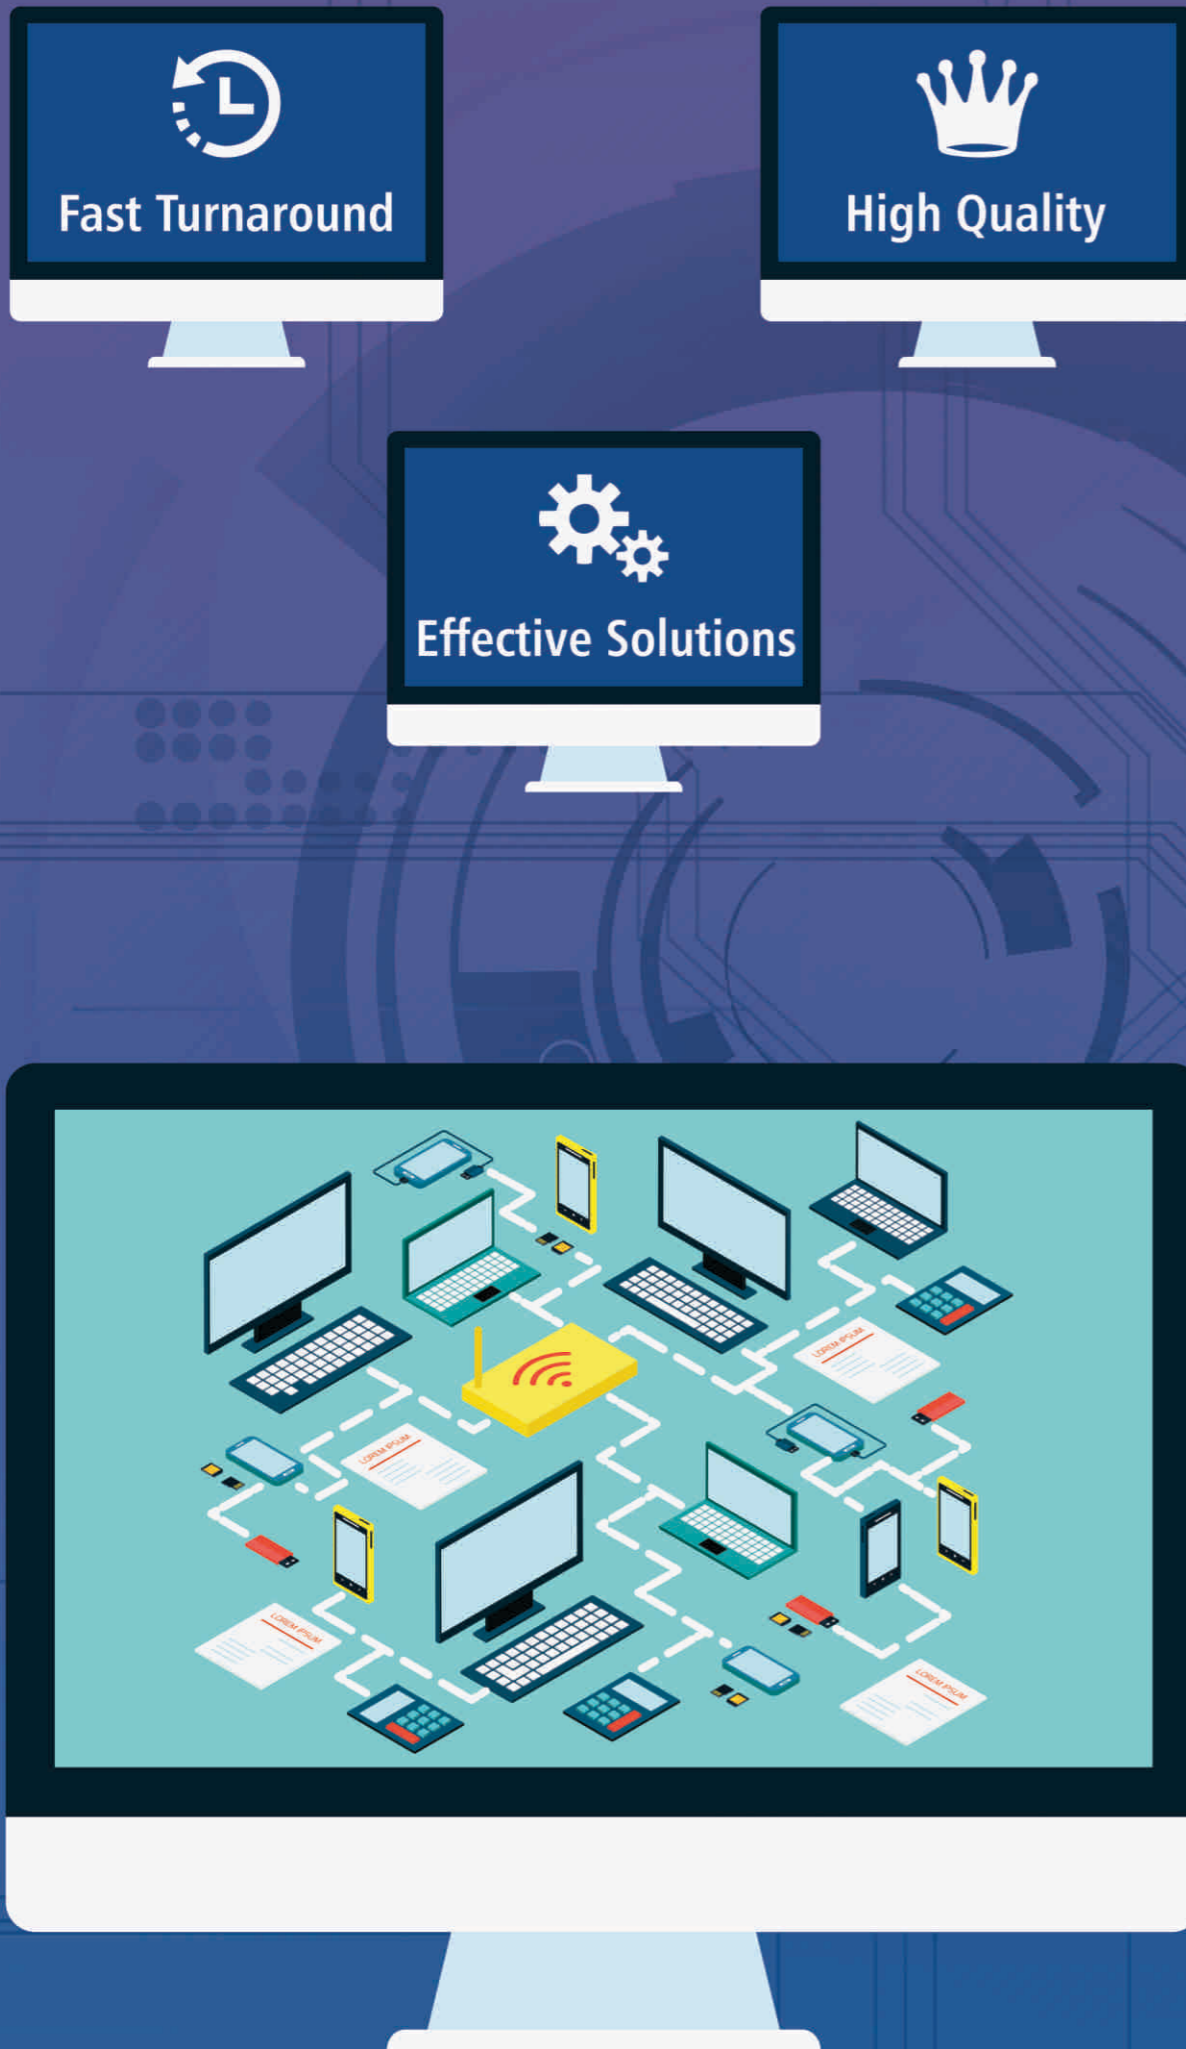

Open Communication with Everyone

An Environment where Great People work together to contribute to the overall direction of the Company

Honesty, Respect, and Humility with each other, Our Partners and Our Customers

Mindset to Continually think ahead, while ensuring backwards Compatibility

WHY TECH COMPILER?

OUR DELIVERY MODEL

Remote Software Development requires an effective delivery model for the partnership to work to our customer's advantage in terms of efficiency and cost. We have a very effective offshore delivery model that will ensure:

PRICE AND QUALITY EQUILIBRIUM

We deliver high quality and cost effective software development services recognized by our timeliness and creativity at prices considerably lower than those onshore or near-shore, helping our clients to extremely reduce the costs of IT-Development.

CONTINUOUS SUPPORT AND DEVELOPMENT

With Teams working across different time zones, Tech Compiler provides round-the-clock services to its customers. Last night's problem turns into this morning's solution!

RESPONSE TIME

With a state-of-the-art communication system in place, Tech Compiler is well positioned to establish quicker interaction with customers and to have quick response time.

QUALITY DELIVERABLES

Tech Compiler is able to provide quality deliverables to customers globally through its efficient processes and effective Project Management Techniques.

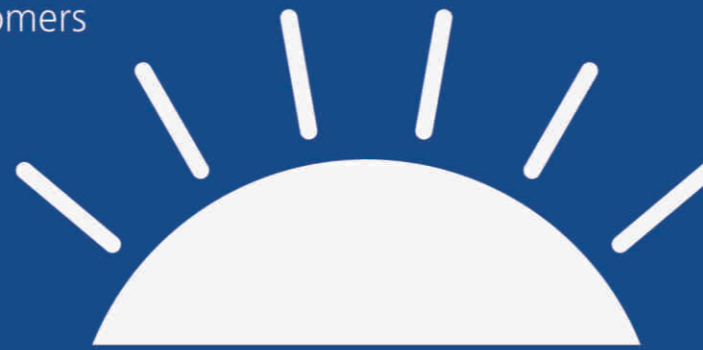

ENTERPRISE SOLUTIONS DEVELOPMENT

We have skills and deep expertise in building enterprise solutions of various complexity levels. Our experience in Business Process Management, Resource Planning, Customer Relationship Management and other business domains allows us to provide our customers with the best-practice custom solutions.

MOBILE APPLICATION DEVELOPMENT

Extend your sales, customer service and marketing efforts to the most popular mobile platforms, such as Android, Windows Mobile, iOS and others. We can help you connect your customers and employees to corporate systems, create a mobile software product or a client application to your own or third-party information service.

WHAT WE DO ?

Tech Compiler has proven expertise in delivering next generation custom software solutions in accordance with specific user requirements. With us, you get the confidence and convenience that comes with partnering with one company throughout the entire software design and development cycle.

Whether you are looking for a web-based software application, desktop application or any other software product, our reliable and professional software development team provides the design and development of the application as well as maintenance and support services.

Our Global Software Services include:

DESKTOP APPLICATION DEVELOPMENT

We create cross-platform standalone and client-server business applications ensuring stable functioning, high performance and usability.

WEB-BASED APPLICATION DEVELOPMENT

Tech Compiler develops custom web applications rich with features, sites and portals for corporate and internet focused projects: E-commerce, Online Servicing, Order Processing and much more.

DISTRIBUTED APPLICATION DEVELOPMENT

Distributed Development is one of the highest forms of collaboration. If you have recognized ever-increasing demand for cost-effective and reliable software solution, get ready and gear up with large-scale distributed applications custom designed for your needs by Tech Compiler.

GOOGLE APPLICATION DEVELOPMENT

Our dedicated team of google apps developers are proficient in java/google code for google apps development. We create and optimize Google apps of any size tailored to specific business needs and also provide google apps integration and management services.

APPLICATION TESTING SERVICES

Rolling out reliable fully functional applications requires rigorous and systematic testing. We provide a whole array of testing services. We can also develop test plans for applications developed by third parties. Our team can provide a formal test plan, including periodic reports for documenting issues found and identified by using custom or open source tools like Mantis.
